As result of those activities, Pembroke Local Council will proudly introduce to the other project Partners a common vision of key intervention and its own Local Pilot Operative Plan (LPOP) for the sustainable development of local rural areas.

These results will soon be publicly shared during an open-event that will take place in the Pembroke area and where everybody is welcome to participate and be part of this new innovative process where our ideas can take voice.

We proudly invest in your future to preserve our common natural resources.

Integrated Strategy for Sustainable Development of Mediterranean Rural Areas

Medstrategy

In order to achieve said cooperation at various levels between all involved key-actors, Pembroke Local Council has already and successfully organized a number of consultation meetings, interactive workshops (EASW® - European Awareness Scenario Workshops) and activities.

During those events and workshops, all attendees had the opportunity to firstly express their own concerns through a negative view that highlighted possible obstacles and difficulties. Subsequently, everybody drew a different, alternative and imaginary positive scenario to suggest and provide new generating ideas towards the themes of the project.

ROLE OF PEMBROKE WITHIN MEDSTRATEGY

Pembroke Local Council, together with the Lead Partner of the project (Consortium "Tindari-Nebrodi", Messina – Italy), the other project Partners (ANCI Sicilia, Palermo – Italy; Crete – Greece; Province of Teruel – Spain) and other Associated Partners endeavor to implement the objectives and tools of the project through a number of activities and events aimed to increase awareness towards the project themes and involve the participation of a large public that comprises all key actors and stakeholders from citizens to decision-makers.
